

Through close working partnerships with manufacturers and distributors, Bramatt Computing are able to supply over 50,000 hardware and software product lines.

At Bramatt Computing you do not simply talk to a telesales call centre; all clients are allocated a dedicated account manager providing technical assistance and advice in your procurement process. All Bramatt account managers have an absolute minimum of 2yr's experience in the industry and through working in teams, always have additional senior technical resource on hand where necessary.

Should you already know the products you wish to purchase and simply want to quickly place an order; our online ordering system may be more appropriate.

The Bramatt E-commerce solution (www.bramatt-online.co.uk) has been setup to allow customers quick access to product lines and the ability to order product 24 hours a day, 7 days a week. Real time stock availability allows you to confirm delivery and lead times; in addition next working day delivery to any UK address is also possible, thus providing a quick and effective ordering system.
