

Bramatt Computing do not want to be just your typical value added reseller within the UK. Bramatt Computing are here to bridge the gap between the typical value added resellers and the more common stack them high, sell them cheap online e-traders.

The online e-traders deliver very cheap product, but with no real value or knowledge. The typical value added reseller typically cannot match the online retailers but has expertise and specialisation in the products they sell.

Bramatt Computing offers and delivers the best of both; our internal account managers and consultants can deliver the valued information, expertise and product support. In addition our e-commerce website holds over 70,000 IT product lines all priced at the most competitive prices in the UK.

Bramatt Computing has three distinctive operating areas of specialisation:

1. Storage and Virtualisation: Virtualisation Solutions, Business Continuity, Data Management, Data Replication, Duplication, E-mail and File Archiving, Disaster Recovery and Backup.

2. Hardware and Software Procurement: Bramatt computing cover this area with two options for you to choose from. The first option is our e-commerce platform; this is for customers who know what they want and like to buy competitively online, browsing products via an e-commerce website. The second option is for clients who like to speak to real people; our internal account managers have the knowledge and experience to discuss your requirements and recommend products based on your needs. This allows us to provide that extra help and advice they require.

3. Professional Services: Engineering Installations, Helpdesk Support Contracts, Consultancy Services, Project Management. This covers a broad spectrum of products from straight forward desktop rollouts to the design and planning of server deployments and virtualisation solutions.

Why not call us to discuss your IT requirements.
