

Bramatt Computing are pleased to provide our IT services to the Charity and Not for Profit arena.

We know that choosing your IT partner is not an easy process and this is more important with charities than any other market sector.

We have been IT partners for some of the best well known Charities in the Midlands and across the UK for over 6 years; this is testament to our approach, pricing and pre/post sales support.

Please contact us for charity reference's as we believe that our customer statements and references are always better than our own words; these references range from single PC purchases right through to full cinema / conference room AV suites installations and server installations.
