

The Bramatt Remote Management & Monitoring service automates day to day admin tasks, along with the ability to proactively alert emerging problems before they can cause downtime. Your IT estate will be monitored 24/7 to give you piece of mind.

The system covers:-

- Servers and PC's
- E-mail systems
- Performance & Bandwidth monitoring
- Anti-Virus
- Online Backup
- Disk Space Utilisation
- Security
- Hardware Monitoring
- External Websites

All payable on a monthly basis with no capital outlay or infrastructure to purchase. Add or delete users as required, extremely easy to set up with automatic templates to ease installations.

Once installed you will have a clear picture of your IT systems, be able to analyse risk areas and have a proactive view of your IT network. All of this helps reduce downtime and increases productivity to your site.
